Update!! Use after 365 days! There has been a bit of news in the media that Whatsapp For Nokia E52 has been made free for India. No charge after 1 year of use. Nothing like that reflects here. please clarify. Almost perfect. Diagonal platform, desktop integration (via webapp) and reading receipts are perfect. I'd like more customizable options, though. Also, to people who complain that they have to pay after a year, it's 99 cents. Think about how much you spend on food every day. I wish it had a live sound, like Voxer does. It would be nice if Press the play button and play all the messages, instead of having to press the game for each individual message. It would be nice to have a speed button, as Voxer does, to speed up the game of messages. Be nice to have variable background, for every conversation, as we Whatsapp for Nokia E52 do. In addition to these feature requests, it is a great application. I liked this Whatsapp For Nokia E52. Shows you shows your friend is logged in and the time of the messages. The only way to improve it may be to be able to lock the app or some conversations with a password, because anyone who has your phone can see your conversations just like with instant messaging. Im.
